

The versatile small-form factor, high performance vehicle Telematics platform

The ExcelFore EagleEye platform is a high performance platform for vehicle monitoring and industrial process monitoring automotive multimedia and infotainment applications.

ExcelFore EagleEye is packaged with all of the essentials for a complete connected Telematics monitoring requirements for various monitoring, safety, and productivity-enhancing applications as follows:

- GPS Location
- Live Movement
- Geofencing

BROADEST ARRAY OF ACCESSORIES

- RFID
- Immobilizer
- Fuel Monitoring
- Temperature Monitoring
- Load Monitoring
- SOS

PATENTED FUEL MONITORING SYSTEM

Other Special Features

- Remote Diagnostics
- Remote Setup
- Remote Update
- Power Management
- CAN Data Monitoring

WORLD'S FIRST TWO WHEELER MONITORING SYSTEM

ExcelFore EagleEye

Small form-factor, high performance Telematics Gateway

Vehicle Tracking

Fleet Management

- Tracking
- Fuel
- Load

Asset Monitoring

- Container
- Railroad
- Military
- Police

Security High Value Asset

- Night Bus
- Ambulance
- Courier
- Armored Car

Alerts

- Alarm
- SMS
- Geo-fence
- Surveillance

Medical

- Patient Monitoring
- Equipment Monitoring

Industrial Process

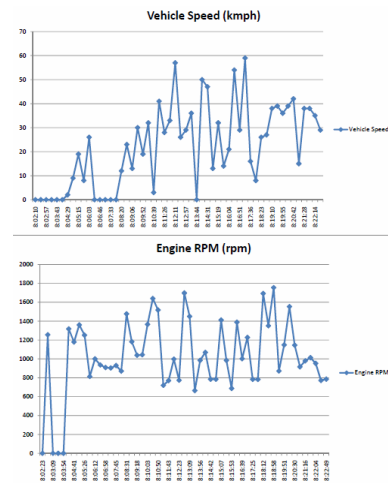

- Cell Tower
- UPS
- Generator
- Robots

Eagleye Accessories

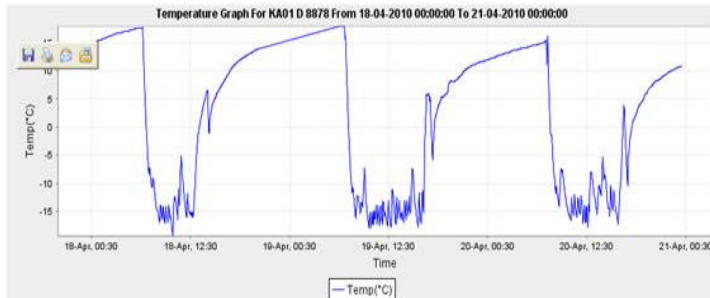

- Fuel monitoring
- Temperature monitoring
- Taxi meter interface
- RFID for passenger monitoring
- RFID for driver identification and monitoring
- Immobilizer
- Camera
- Garmin navigation interface
- CAN bus interface (OBDII and J1939)
- Drive pattern measurement: Motion detect, Harsh breaking/Acceleration, rollover
- Local SMS Gateway using an off the shelf carrier connection

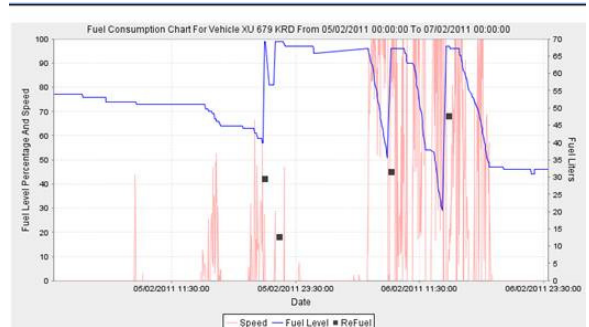

Garmin + Taximeter interface

CAN Data

Temperature Graph

Fuel Graph
